

June 28, 2026

To Whom It May Concern:

I am pleased to recommend Stephen Behunin for any opportunity where data science, analytical rigor, and client-centered execution matter. Stephen joined Healthicity in December 2021 and served as a Data Scientist through June 2026. Over those four and a half years, he became one of the more self-directed and dependable contributors on our team.

When Stephen arrived, our Tableau analytics work was a collection of one-off reports. He built it into a proper offering: four distinct BI products supporting our \$10M+ ARR platform, with more than 100 custom reports in production, supporting the reporting needs of 300+ clients. He consistently translated unique customer requirements into accurate, trusted, and customized reporting that our clients relied on.

A few things set Stephen apart:

- He is highly intelligent and a genuinely dedicated, hard worker. He would be an excellent asset to any organization fortunate enough to bring him on.
- He owned outcomes, not tickets. He carried initiatives from concept through delivery and held the long-term roadmap with very little supervision.
- He translated well between technical and non-technical audiences. Our product and client-facing teams trusted him with direct conversations, and our clients trusted what he produced.
- He worked autonomously without going dark. He consistently surfaced trade-offs, asked the right clarifying questions, and brought finished work to the table.

Beyond the work itself, Stephen is a genuinely good colleague. He is steady, thoughtful, and easy to collaborate with. He takes feedback well and gives it kindly. In a small company moving through significant change, including our acquisition this past June, those qualities matter as much as the technical ones.

I recommend Stephen without reservation. Please feel free to reach out directly or through LinkedIn if I can answer any questions.

Sincerely,

Darin Johnson, MBA

CEO
